

## Question: Build a Conference/Event Landing Page with Registration Form Using HTML and CSS

### Project Description:

Create a **fully responsive and visually appealing conference/event landing page** using **HTML5 and CSS**. The page should allow users to **register for the event**, provide essential details about the event, and showcase speakers, venue, and schedule. The **"Register Now" button** should link to a **separate registration page** containing a form.

---

### Requirements:

#### 1. Header & Navigation Bar

- Display the **event name and logo** at the top.
  - Include navigation links: **Home, About, Speakers, Schedule, Venue, Register, Contact**.
  - Add a **hover effect** for menu items.
  - Make buttons **change color, grow in size, or glow** when hovered over.
  - Use **sticky navigation** so the menu stays visible when scrolling.
  - Include a **search bar** for quick access to content.
- 

#### 2. Hero Section (Event Introduction)

- Display a **full-width background image** representing the event theme.
  - Include a **welcome message, a tagline, and a "Register Now" button**.
  - The **"Register Now" button** should link to a **separate registration page** where a form is displayed.
  - Add a **CSS animation** to highlight the call-to-action.
- 

#### 3. About the Conference Section

- Describe the **purpose of the conference** and **who should attend** (e.g., developers, students, business leaders).
  - Add a **two-column layout** (text on one side, an image on the other).
  - Use **CSS Grid or Flexbox** for alignment.
- 

#### 4. Speakers Section

- Showcase at least **3-5 keynote speakers** with:
    - **Profile Image**
    - **Speaker Name & Title**
    - **Short bio**
  - Use **hover effects** to reveal more details about each speaker.
  - Add Gradient Text Effect
- 

#### 5. Schedule Section

- Display a **table format schedule** with:
    - **Time slots**
    - **Event topics**
    - **Speakers' names**
  - Use **striped rows** for better readability.
  - Include **hover effects** to highlight the current session.
-

## 6. Venue Section

- Show a **map of the venue location**.
  - Add a **detailed description of the venue** (facilities, accessibility, directions).
  - Use **CSS grid** for a structured layout.
- 

## 7. Registration Page & Form

- The **"Register Now" button** in the Hero section should **link to a separate registration page (register.html)**.
  - Add Glow effect on Register Now button
  - The **registration page should contain a form** with the following fields:
    - **Full Name** (Text input)
    - **Email Address** (Email input)
    - **Phone Number** (Number input)
    - **Ticket Type** (Dropdown: Standard, VIP, Student)
    - **Additional Notes** (Textarea)
    - **Submit Button**
  - Validate the form using **HTML5 form validation**.
- 

## 8. Footer Section

- Include **Quick Links, Social Media Icons, and Contact Info**.
- Add a **newsletter subscription form**.
- Ensure the footer **sticks to the bottom** of the page.
